

AFTER TREATMENT

(Brows, Lips, Eyes)

How to take care of area (over first 7 days or until scabs are completely gone)

- Day 1: starting 30 min after treatment. Wash area every two hours with neutral soap & apply provided ointment. If the procedure was completed after 4 pm, please recommend patch before bedtime.
- Day 2: wash 5 times during the day, pat dry, & apply thin layer of ointment.
- Day 3-7 on these days, it's not necessary to wash the area, only apply the ointment 4-5 times a day.
- DO NOT APPLY TOO MUCH OINTMENT (thin layer only)
- Keep area dry (avoid submerging in water for too long; ex. Swimming or sauna. A quick shower or washing face is fine, just avoid the area)
- No exercising, tanning, waxing or threading.
- No makeup, eyebrow pencil, lotion or other facial products.
- If necessary, use an eyebrow pencil to touch up after eyebrows heal completely. (Ask about our PMU safe filler pencil available for purchase)

What to expect (days may vary for everyone)

- Immediately after: shape may appear uneven due to swelling
- Day 1 – 3: Area will appear darker and thick.
- Day 4 – 7: Area will be dry and itchy. Do not scratch, rub or pick. Area may start to scab, crack or flake off. Area will look patchy and uneven during healing process. It is absolutely normal and crucial to leave area alone. Please **DON'T PANIC**.
- Day 7 – 10: scabs should be all gone (some can take up to 3 weeks)
- Sometimes area will appear as if there is no color. The remaining color has absorbed under the layer of skin and in the following week it will resurface as skin cells repair.
- Week 3 – 4: area will appear it's true color. Area might still look patchy or have an uneven shape. Some rare cases the pigment does not retain well.
- Week 6-8: come back for a touch up. Any small corrections can be made at this visit. Please not touch up price is not included in initial appointment. Touch up rates increase after 8 week period. See touch up rates for more information on this.

Please Note:

Subjective effect on different individuals, e.g. skin types that affect the attachment of color. Most clients will need two sessions; some will only need one and some will need a third touchup to complete the look at an additional charge.
